

Abstract

A digital camera including a layout inputting unit that inputs a layout in drawing a digital image, an internal memory stored with the inputted layout, a selection receiving unit (S400) that receives selection of the layout stored in the internal memory, an object image outputting unit (S410, S420) that outputs the digital image outputted by the converting unit to a removable memory by being related to the layout selected by the selection receiving unit, and a layout unit (S440) that outputs the layout stored in the internal memory in the removable memory stored with the digital image by the object image outputting unit.
